S FIT EQ+

Laufenn

Journey in Style

Produced by a leading tyre manufacturer, Laufenn delivers quality tyres at affordable prices, allowing you to buy with confidence.

An exceptionally comfortable and smooth driving experience through optimised performance in any weather or season.

Durable and reliable, with an impressive performance on a wide range of road conditions you'll encounter regularly in your everyday life.

Confident

The durability Laufenn provides is rooted in its uncompromising commitment to quality. When you go to work or head out to meet your friends... When you go on a trip or venture out to a new place... Laufenn is a reliable tyre range providing optimised performance.

Simple

Laufenn is simple with no add-ons and nothing to spoil your driving experience. Committed to the basics, Laufenn offers a pure driving experience tailored to your needs.

Value

Laufenn provides value, durability and quality tyres which adapt to the different road conditions you are faced with everyday.

Sensible

Laufenn understands your need for reliability every single day, without compromising on affordability, performance, style or ride comfort.

S FIT EQ+

Ultra-High-Performance Summer Car Tyre

Wet

Dry

Wear Life

Fuel Efficiency

The S FIT EQ+ is designed for drivers looking for powerful driving in wet and dry conditions, with greatly improved wet braking and handling.

FEATURES

Ultra-High-Performance Summer Car Tyre with greatly improved wet braking and handling:

- Asymmetric tread design for safe driving
- Long wear life and higher fuel efficiency
- Impressive wet braking and handling

S FIT EQ+

Speed Symbol : H~Y

S.W. : 185~275

Series : 35~70

Inch : 15~20"

EU Label : C~E / A~B / W2

Key Performance

Improvement in performance compared to predecessor

S FIT EQ+

S FIT EQ

Wet Braking

Compared to its predecessor, this tyre demonstrates a far superior braking performance which allows the driver to be safe. By applying 2nd generation Laufenn silica compound, the impressive reduction of the braking distance on wet surfaces can prevent many dangerous and emergency situations.

Wet Braking is improved by 9%.

Dry & Wet Handling

By applying an optimised pattern design technology and enhanced block hardness, this tyre demonstrates handling performance which allows the driver to experience great stability.

Noise & Ride

By applying a straight rib block design and stable foot shape, this tyre allows for superior comfort and low noise levels to both the driver and passengers.

Wet

An advanced asymmetric tread pattern enables excellent performance for any road or driving conditions.

Positive Aqua Hydro Block

An advanced aqua hydro block design was developed through 3D hydroplaning simulation to provide highly efficient wet braking.

Streamlined Kerf & Sipe

Streamlined kerfs & sipes provide highly efficient drainage in wet conditions.

Drainage Inducement

Groove Edge

Drainage inducement groove edges help to optimise an efficient wet braking.

4 Channel Rib Type Design

4 straight groove design improves stability on wet road surfaces.

Wet

The S FIT EQ+ applied the 2nd generation Laufenn silica compound to enhance the safety in wet conditions.

2nd Generation Laufenn Silica Compound

The 2nd generation Laufenn silica compound improves wet performance without sacrificing other performances.

Maximising wet grip by using nano-sized silica.

Specifically, wet performance is improved by employing highly purified and quality silica compound.

Wet braking performance

Advanced Mixing Technology

Advanced mixing technology allows for splitting the silica into nano size and it leads to securing solid driving performance.

— Connected polymer

1 step → 2 step → 3 step

Handling & Cornering

The S FIT EQ+ helps drivers enjoy a comfortable drive by reducing noise and vibration.

INSIDE

OUTSIDE

Handling Performance

Even loads transfer vertically and laterally, they maintain a stable foot shape through an optimal design based on multiple tread radius profile and equilibrium carcass line.

Traction force at driving

Traction force at cornering

Asymmetric Pattern Design

Advanced asymmetric pattern design helps to prevent road noise and increase cornering grip and maximise handling performance on dry roads.

Tie-Bar

Application of tie-bar technologies ensures optimal block stiffness.

Cornering & Noise

Reduction Rib

A straight rib block applied to the outside of the tyre helps to prevent road noise and increase cornering grip.

S FIT EQ+

Wear Life

Wear Life

Fuel Efficiency

Braking

The S FIT EQ+ is designed for smart drivers, who want to ensure both longer wear life and higher fuel efficiency.

Special Rubber Layer

The tread pattern and special rubber structure minimise rotational resistance and maximise fuel efficiency.

Long Mileage and Even Tread Wear

An optimised tyre profile designed by advanced computer-aided simulation improves braking performance and wear by evenly distributing weight over the tyre's contact patch.

EVEN PRESSURE

TYRE STRUCTURE

The S FIT EQ+ adopts new technology for premium vehicles, engineered for exceptional control and a quiet and comfortable ride.

* The model size in the structural diagram is for the 225/45ZR18Y XL tyre, and the descriptions of structural diagrams may vary by size.
