

Completely new winter experience

NEW

MP93 NORDICCA FOR COMPACT-CLASS UP TO SUVs

The new flagship winter tyre from Matador is coming with completely new pattern design and strong winter performance. The new **MP 93 Nordicca** gets you where you want to go quietly, safely and efficiently, with less worry so you can enjoy the journey.

- ◊ Impressive grip and control in winter driving conditions
- ◊ Reliable protection on wet and slushy roads
- ◊ Very even tread wear and light rolling

FOR COMPACT-CLASS UP TO SUVs

m+s

Technical Highlights

Snow traction

The new tread pattern is developed with a higher number of edges for a significant increase of your car's traction on snowy roads. Each block and sipe is designed to enhance braking performance and reliable cornering. Combined this adds up to a safer, more enjoyable ride.

Aquaplaning

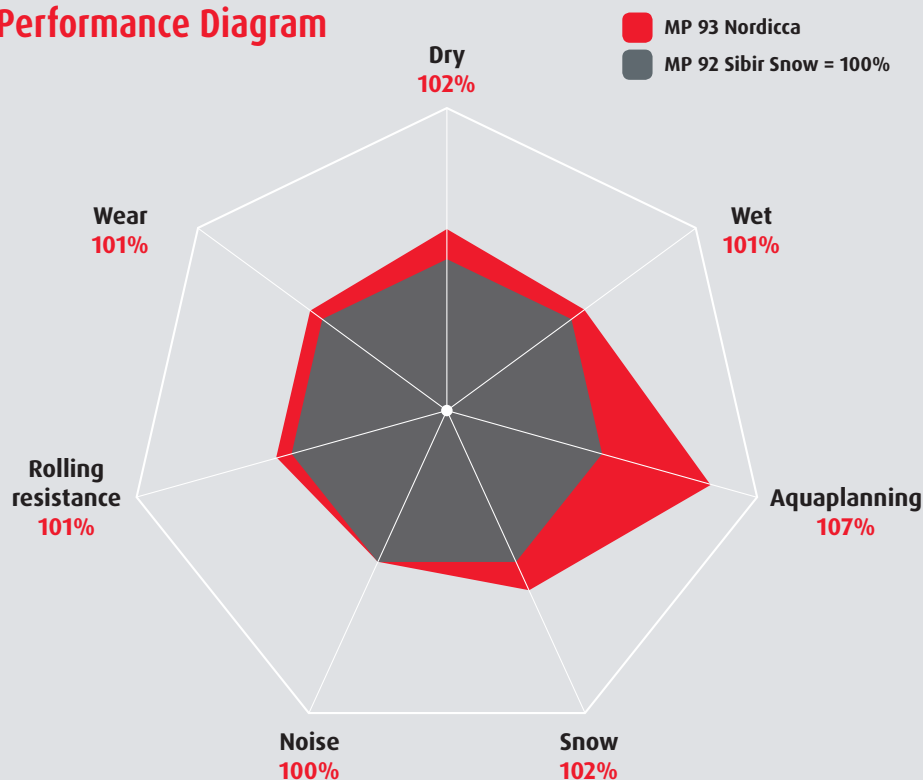

The V-shaped groove structure with continuous open grooves creates water channels and improves the efficiency of aquaplaning and slushplaning prevention. This helps to maintain constant road contact on wet and slushy surfaces.

High mileage

Even surface distribution causes even wear. For you, it means a more comfortable, quieter ride. Add in the fact that even tread wear means higher mileage and lighter rolling, and your ride just got more effective.
